

In the Claims

Claims 1 – 4 (Cancelled)

5. (Currently Amended) A thermoplastic resin structure formed of a resin composition that comprises (a) from 55 to 95 % by volume of a polyolefin resin and (b) from 5 to 45 % by volume of a polyphenylene sulfide resin, based on the sum of components (a) and (b), which is characterized in that, in morphology therein seen through electronic microscopy, the polyolefin resin (a) forms a continuous phase and the polyphenylene sulfide resin (b) forms a laminar disperse phase.
